ANUSHKA MANEESH RAI

Software Developer - Frontend & Backend

Bangalore, Karnataka, India | anushkarai432@gmail.com | +91 7304220098 | https://www.linkedin.com/in/anushka-rai-3111ar/ | https://github.com/Anushkarai3A

Professional Summary

Software Developer building real-time, production-grade apps with Node.js/Express, React.js, and WebSocket, backed by secure design (JWT auth, RBAC, modular services). Delivered three end-to-end projects: an AI interview prep platform with voice-driven feedback, a live analytics dashboard streaming metrics at sub-100ms latency, and a peer learning marketplace with real-time chat and event-driven booking. Strengthening TypeScript, DSA, and cloud fundamentals.

Technical Skills

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Vite.
Backend & APIs: Node.js, Express.js, Python, MySQL, FastAPI, PostgreSQL, REST APIs, GraphQL, MongoDB, Web Scraping
Testing & DevOps: Jest (Unit & Integration), Git, GitHub, Agile/Scrum, CI/CD pipeline
Tools & AI/Automation: Postman, Power BI, Google Cloud Platform, Docker Compose, ML, Generative AI, Prompt Engineering, Agentic AI, n8n
Core CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

Key Projects

NexusAI - AI-Powered Interview Preparation Platform (GitHub Link) Jan-Feb 2026
MERN Stack, Web Speech API, JWT Authentication, REST APIs, WebSockets

- Engineered a full-stack AI interview prep platform featuring real-time voice-driven coding feedback using the Web Speech API, enabling candidates to simulate technical and behavioral interviews end-to-end.
- Implemented JWT-based authentication with bcrypt password hashing and session persistence, securing 100% of API routes with role-based access control for interviewer and candidate personas.
- Built a real-time performance analytics dashboard tracking session scores, question-response latency, and skill progression over time, providing actionable improvement signals after each session.
- Architected a RESTful Node.js/Express backend with structured middleware, global error handling, and modular routing, designed to support 50+ concurrent interview sessions without degradation.

Realtime Analytics Dashboard - AntiGravity Analytics (GitHub Link) Jan-Feb 2026
(React.js, Node.js, Socket.io, WebSockets, Recharts)

- Designed and delivered a high-throughput, real-time analytics dashboard that streams 5+ live system metrics — including active users, revenue deltas, and error rates — with sub-100ms render latency using Socket.io and WebSockets.
- Integrated Recharts to render dynamic, auto-updating charts with smooth transitions, improving data readability for engineering and product stakeholders monitoring live system health.
- Applied service-oriented backend architecture with structured logging, request tracing, and global error middleware, enabling fault isolation and scalable horizontal deployment.
- Reduced data-to-display pipeline latency by eliminating HTTP polling in favor of persistent WebSocket connections, cutting unnecessary server load by an estimated 60% compared to polling-based alternatives

SkillSwap - Peer Learning & Mentorship Platform (GitHub Link) Jan-Feb 2026
(MERN Stack, JWT, Bcrypt, Socket.io, REST APIs)

- Built a full-stack peer learning marketplace enabling users to exchange skills, book 1:1 mentorship sessions, and communicate securely, with a seamless onboarding flow for both mentors and learners.
- Implemented real-time bi-directional chat using Socket.io, supporting instant message delivery and read receipts across concurrent user sessions without message loss.
- Developed end-to-end session booking workflows with acceptance/rejection state machines, calendar-aware scheduling, and automated notification triggers using event-driven Node.js logic.
- Enforced role-based access control (RBAC) using JWT and bcrypt, restricting mentor-only actions and protecting 100% of sensitive API endpoints from unauthorized access

Education

B.Tech : Computer Science & Engineering 2023 – 2027
Acharya Institute of Technology, Bangalore | CGPA: 7.5 / 10

Higher Secondary (10+2) 2019 – 2023
St. Joseph's High School, Panvel, Maharashtra | 10th: 94% | 12th: 65%

Certifications and Awards

- Advanced Software Engineering Job Simulation: Walmart Global Tech (Jan 2025) | Focus: Data Structures, scalable system design, and software architecture best practices
- Director of Operations, AiCon'26, AIMUNSOC (2026): Led end-to-end operations for a national-level MUN conference, coordinating logistics, planning, and execution across 10+ teams to deliver the event on schedule.
- Honourable Mention as Delegate of the Russian Federation: KLELCB Model United Nations (Dec 2023): Demonstrated research depth, structured argumentation, and diplomatic communication.
